PROFESSIONAL SUMMARY

10+ years building and running quality, process and operations systems for executive and business functions, with hands-on daily use of generative AI tools (ChatGPT, Claude, Microsoft Copilot, Gemini, Perplexity) for research, drafting, and reporting. Built an n8n workflow that pipes meeting transcriptions through Claude for summarisation and pushes extracted action items into Notion to keep a tracker current, plus a freelance Calendly/Zapier/Airtable/Slack onboarding automation and a LinkedIn outreach automation for personal network growth. Brings an 8.5-year audit and quality-assurance discipline — SOP improvement, KPI tracking, systematic error-detection — directly to reviewing AI-generated output for accuracy, tone and confidentiality. Operates independently in fast-paced, high-accountability environments, owning outcomes rather than tasks.

CORE SKILLS

- Generative AI Tools — ChatGPT, Claude, Microsoft Copilot, Gemini, Perplexity (daily use for drafting, research, summarisation)
- AI Output Review & Quality Control — Accuracy, tone and compliance review before use; data-confidentiality guardrails on sensitive content
- No-Code Automation — Zapier, Airtable, n8n, Make, LinkedIn Helper; built workflows for client onboarding, meeting-to-tracker action item automation, and outreach sequencing
- Process Mapping & Workflow Documentation — Translating manual processes into automated, trackable workflows; basic API/webhook understanding
- Process & Quality Assurance — SOP review & improvement, audit-based quality checklists, KPI tracking & reporting, calibration & scoring consistency
- Operations & Workflow Coordination — Cross-functional coordination, dashboard & tracker design, process documentation
- Data & Reporting — Performance reporting, data-driven insights, Excel/Google Sheets
- Stakeholder & Vendor Management — Cross-functional liaison, vendor research & evaluation, confidential information handling
- Productivity & CRM Tools — Notion, Asana, ClickUp, HubSpot, Microsoft 365 (Outlook, Word, Excel, PowerPoint, Teams, SharePoint)

PROFESSIONAL EXPERIENCE

Personal Assistant to C-Suite Executives — Group SNS Apr 2025 – Present
Dubai, UAE

- Designed and built a monthly action-item tracking workflow using n8n: Microsoft Copilot meeting transcriptions feed into Claude for summarisation, with action items pushed into Notion via n8n to create and update tracker entries for weekly follow-through.
- Run daily research, drafting and reporting workflows for 6 C-suite executives using generative AI tools (ChatGPT, Claude, Microsoft Copilot, Perplexity, Otter.ai), reviewing every output for accuracy, tone and confidentiality before use under data-confidentiality guardrails.
- Designed and rolled out a company-wide employee feedback process end-to-end (tool evaluation, stakeholder rollout) and built structured tracking systems in Notion that brought process consistency to hiring operations across the group.
- Own vendor research and evaluation against defined criteria, producing structured comparisons that inform leadership procurement and cost-control decisions across India, Africa and the Middle East.
- Planned and executed a 16-person international conference logistics operation end-to-end — visa tracking, flight coordination, accommodation — across multiple origin cities with zero scheduling errors.

Executive Assistant to CEO — Bright Minds

Sep 2024 – Apr 2025

Dubai, UAE

- Directly managed a 10–12 person operations team based in India, owning day-to-day performance, productivity and accountability for the group.
- Led end-to-end hiring for a startup's team build-out — sourcing, screening and hiring 5 team members — using ChatGPT and Microsoft Copilot to accelerate candidate research and evaluation.
- Negotiated supplier contracts and managed vendor relationships and procurement end-to-end, obtaining quotations to drive cost control across cross-border operations spanning India and Canada.
- Ran performance evaluations and operational audits, using AI tools to support analysis and reporting, and translating findings into accountability measures for the team.

Senior Associate — ADP Pvt Ltd

Nov 2023 – Jul 2024

Pune, India

- Owned accuracy and compliance for high-volume global payroll processing under strict deadlines, building the same systematic accuracy-under-volume discipline now applied to reviewing AI-generated output.

Executive Secretary to CEO — StandOut Authority

Mar 2021 – Apr 2024

Remote — USA (Part-Time)

- Ran scheduling, prioritisation and global travel logistics for the Director and CEO across time zones, using AI tools to accelerate research and drafting.

Senior Quality Analyst — WNS Global Services

Mar 2015 – Sep 2023

Pune, India

- Owned process training for new hires as Senior Analyst in Operations, processing insurance claims/transactions and training 8–10 team members on process and systems, before promotion to Senior Quality Analyst for strong process expertise and audit accuracy.
- Audited 50–150 insurance claims/transactions weekly (motor, total-loss and third-party) against quality checklists and SOPs on the Suncorp account, sustaining a 95%+ accuracy score throughout an 8.5-year tenure.
- Drove SOP and quality-checklist improvements based on recurring audit findings, and represented the account in client calibration sessions to align scoring standards across the team.
- Built a systematic error-detection practice across structured audits — the same discipline now applied to reviewing AI-generated output for accuracy.

Senior Associate — Mphasis

Jul 2011 – Sep 2013

Pune, India

- Resolved 200+ customer inquiries weekly at a 95% resolution rate, recognised for service excellence.

INDEPENDENT PROJECTS

- **Freelance Automation Work (2021–2024):** Designed and built a multi-stage client onboarding automation connecting Calendly, Zapier, Airtable and Slack to trigger record updates and team notifications at each stage, replacing manual status tracking.
- **LinkedIn Outreach Automation (Personal Initiative):** Built an outreach automation (LinkedIn Helper) for personal job search and network growth — connection requests, follow-up message, post engagement, second message — generating ~500 new connections via ~60 weekly outbound messages.
